Research Papers

Analytical derivation of the flood frequency curve through partial duration series analysis and a probabilistic representation of the runoff coefficient
M. Franchini, G. Galeati and M. Lolli 1
Assessment of preferential flow processes in a forest-reclaimed lignitic mine soil by multicell sampling of drainage water and three tracers
E. Hangen, H. H. Gerke, W. Schaaf and R. F. Hüttl 16
Groundwater $\delta^{18}O$ and δD from central Indian Peninsula: influence of the Arabian Sea and the Bay of Bengal branches of the summer monsoon
S. K. Gupta, R. D. Deshpande, S. K. Bhattacharya and R. A. Jani 38
Estimating groundwater recharge using the SMAR conceptual model calibrated by genetic algorithm
M. A. Fazal, M. Imaizumi, S. Ishida, T. Kawachi and T. Tsuchihara 56
Impacts of irrigation and dryland development on groundwater discharge to rivers—a unit response approach to cumulative impacts analysis
J. H. Knight, M. Gilfedder and G. R. Walker 79
The vulnerability of groundwater to pesticide contamination estimated directly from observations of presence or absence in wells
F. Worrall and T. Besien 92
Seasonal ^{18}O variations and groundwater recharge for three landscape types in central Pennsylvania, USA
M. A. O'Driscoll, D. R. DeWalle, K. J. McGuire and W. J. Gburek 108
Water flow from a horizontal tunnel in an unsaturated zone
M. Kompani-Zare, H. Zhan and N. Samani 125
Robust parametric models of runoff characteristics at the mesoscale
L. Samaniego and A. Bárdossy 136
A quantitative method for the characterisation of karst aquifers based on spring hydrograph analysis
A. Kovács, P. Perrochet, L. Király and P.-Y. Jeannin 152
Quantifying uncertainty due to random errors for moment analyses of breakthrough curves
M. C. Brooks and W. R. Wise 165
Impact of climate change on river flooding assessed with different spatial model resolutions
M. J. Booij 176
Determination of an optimal unit pulse response function using real-coded genetic algorithm
A. Jain, S. Srinivasalu and R. K. Bhattacharjya 199
Uncertainties in partial duration series modelling of extremes related to the choice of the threshold value
S. Beguería 215
Locating new production wells using a probabilistic-based groundwater model
E. Stevick, G. Pohll and J. Huntington 231
Micro-variability of hydrological processes at the maize row scale: implications for soil water content measurements and evapotranspiration estimates
F. Hupet and M. Vanclooster 247
Water exclusion from tunnel cavities spanning a water table
E. G. Youngs and A. R. Kacimov 271

doi:10.1016/S0022-1694(05)00041-7

Which potential evapotranspiration input for a lumped rainfall-runoff model? Part 1—Can rainfall-runoff models effectively handle detailed potential evapotranspiration inputs?
L. Oudin, C. Michel and F. Anctil 275
Which potential evapotranspiration input for a lumped rainfall–runoff model? Part 2—Towards a simple and efficient potential evapotranspiration model for rainfall–runoff modelling
L. Oudin, F. Hervieu, C. Michel, C. Perrin, V. Andréassian, F. Anctil and C. Loumagne 290

Discussions

Comment to "Spatial correlation of soil moisture in small catchments and its relationship to dominant spatial hydrological processes, Journal of Hydrology 286: 113–134"
I. T. van Meerveld and J. J. McDonnell 307
Reply to comment by Tromp van Meerveld and McDonnell on Spatial correlation of soil moisture in small catchments and its relationship to dominant spatial hydrological processes
A. W. Western, S.-L. Zhou, R. B. Grayson, T. A. McMahon, G. Blöschl and D. J. Wilson 313
Comment on "Sensitivity analysis and determination of streambed leakance and aquifer hydraulic properties" by X. Chen and X. Chen
S. Christensen 316
Reply to Comment on "Sensitivity analysis and determination of streambed leakance and aquifer hydraulic properties" by S. Christensen
X. Chen and X. Chen 322
Comment on "Sensitivity Analysis and Determination of Streambed Leakance and Aquifer Hydraulic Properties" by Xunhong Chen and Xi Chen, Journal of Hydrology, 2003, vol. 284, 270–284
S. Kollet 328
Reply to comments provided by Stefan Kollet on "Sensitivity analysis and determination of streambed leakance and aquifer hydraulic properties"
X. Chen and X. Chen 331
